Database Information

Name of Data Set:	France: Diocese and Archdiocese Boundaries ca. 1000
Contributors:	This layer was developed by Leland Grigoli in 2013, with assistance from Brendan Maione-Downing. It updates and replaces an earlier version of the layer created by Matthew Polk.
DARMC Scholarly Data Series Citation:	L. Grigoli and B. Maione-Downing, 2013. "France: Diocese and Archdiocese Boundaries ca. 1000," DARMC Scholarly Data Series, Data Contribution Series # 2013-4. DARMC, Center for Geographic Analysis, Harvard University, Cambridge MA 02138.
Original Reference:	Parisse, Michel, and Jacqueline Leuridan, eds. <i>Atlas de la France de l'an mil: état de nos connaissances</i> . Paris: Picard, 1994.

Abstract

This shapefile represents our best current approximation of the boundaries and provincial (or archdiocesan) organization of the bishoprics of the territory of modern France as they existed ca. 1000. The contributors have drawn on the diocesan and archdiocesan (provincial) boundaries as reported in Parisse and Leuridan 1994.
